HDB's List of Products & Suppliers

LPS Home	About Us	Announcements	List of Products & Suppliers
Product Evaluation Requirements	Listing Guide	Online Forms	InfoWeb

Evaluation criteria

Before making the application, the supplier shall check if his product can meet HDB's evaluation criteria. The evaluation criteria for each product are appended under the respective products listed in 'Product Evaluation Requirements'.

The evaluation criteria would cover some or all of the following:

- (a) Testing to show compliance with specific performance requirements. The supplier may be required to engage an accredited laboratory to carry out independent sampling of their product for testing;
- (b) Shop drawings to show compliance with HDB's design, eg. doors, windows, metal gates;
- (c) Examination of the physical design or attribute for which samples need to be submitted;
- (d) Listing in the PSB Corp's Product Listing Scheme (PLS) for products such as switches or fire rated doors;
- (e) Manufacturer's record or product track record for products, which have greater risk in quality deviation due to production or raw materials (eg. tile adhesive);
